SHORT COURSES

Four Weeks - June 9 - July 3

Summer Session—Graduate School, U.S. Dept. of Agriculture

SHORT COURSES

GREAT ISSUES IN POLITICS (Course No. 7—10)

The outstanding political issues facing the United States today will be discussed and will include such major issues as: the economic well-being of the country -- problems of foreign aid and trade -- development of nuclear energy and its consequences -- the opening of the space age.

This course will be treated by an economist close to the scene of policy-making on Capitol Hill.

INSTRUCTOR: Charles S. Sheldon II, Ph. D., Senior Specialist, Library of Congress, and Assistant Director of the House Select Committee on Astronautics and Space Exploration.

MEETS: Mondays and Wednesdays 6:10-8 p.m. **FEE:** \$12.00

HOW TO INCREASE YOUR LEARNING EFFICIENCY (Course No. 2—25)

Scientists at the Massachusetts Institute of Technology report that the learning efficiency of individuals can be increased as much as fifty per cent if they will spend about one per cent of their study time acquiring skill in applying more effective and efficient techniques and methods of learning.

This course takes advantage of these findings. It is designed to increase the student's capacity to learn, to understand, and to better his grades. It will reduce time and effort necessary to achieve these goals.

Although the course is designed primarily for high school seniors and college students, the same, or nearly the same, principles and methods of learning can be used at all levels of instruction: from kindergarten through graduate school. Therefore, teachers and parents may find it worth while to become familiar with improved tools and techniques of learning. They can teach them to their students and children.

INSTRUCTOR: James A. Saunders, Instructor in "The Principles of Least Effort and General Semantics"

MEETS: Tuesdays and Thursdays, 6:10 -8 p.m. **FEE:** \$12.00

AMERICAN ART (Course No. 8—50)

This course will consist of eight illustrated lectures dealing with American artistic expression in sculpture and painting from the earliest times to the present day. The five major periods to be considered will include: AMERICAN ART PRIOR TO THE DISCOVERY OF THE NEW WORLD -- AMERICAN ART OF THE COLONIAL ERA -- AMERICAN ART DURING THE EARLY YEARS OF INDEPENDENCE -- AMERICAN ART IN THE NINETEENTH CENTURY -- AMERICAN ART IN THE TWENTIETH CENTURY.

INSTRUCTOR: Hugh T. Broadley, Lecturer, National Gallery of Art

MEETS: Mondays and Wednesdays, 6:10-8 p.m. **FEE:** \$12.00
